FASHION DESIGN COURSE

OVERVIEW

Fashion Design is a creative area where you can apply all of your thinking and make it possible to develop fashion knowledge around our fashion world. Fashion Design and Technology programme is designed to give students a broad-based platform to excel in the fashion industry. Students will combine the knowledge of fashion and textile studies with intense studio experience and gain employability skills through core modules on personal and professional development and communication skills. There is strong emphasis on Art and Design in the foundation semester which is mandatory for all students. Students will learn fundamentals of art & design, patternmaking, draping and sewing techniques. They will also master Computer Aided Design (CAD) and learn how to take design from initial concept to a fully finished garment. Students will also learn how to develop their own collections and present those to the audience.
